

## Sprint 1 Report, Tagrides, 2/12/18

### Actions to stop doing:

- Stop putting off tasks for later
- Stop underestimating complexity of features

### Actions to start doing:

- Be more specific with tasks and task assignments
- Update work done on Trello more often
- Have more regular Scrum meetings

### Actions to keep doing:

- Non-scrum coding meetings
- Communicating with each other and our sponsor on Slack
- Meeting weekly with sponsors

Work completed/not completed: This is a list of the user stories that were completed during the previous sprint, and a list of the user stories not completed during this sprint (but which were part of this sprint, and were in the sprint plan).

### Completed:

- As a developer I want to become familiar with the development and deployment tools (Go, Android Studio, being familiar with the cloud provider's system, etc).
- As a developer I want a basic backend and database that can be accessed from a client (locally), so that I will eventually be able to use the API on the iPhone or Android app.

### Not Completed

- As a developer I want to deploy the backend on the cloud (eg. AWS), so that the client can use the API endpoints
- As a driver or rider, I want to be able to create an account and be able to login/logout using Android

Work completion rate:
